1.1 Please summarise what you are seeking from us

We seek funds to teach children about climate change and engage them in planting trees and taking care of the existing ones.

1.2 Tell us more about your project, the impact it will have on those it aims to help, and why you consider the proposed approach to be innovative

This is a project that seeks to impart knowledge and skills to children from the age of 8 for the purpose of climate change mitigation. We have developed a syllabus that will enable them gain the knowledge and skills required. In so doing, the children will plant trees at school and at home. They will take care of the trees planted so that they do not die off.

This approach will see their parents developing interest in what the children are doing.
